ABOUT ME

I am a positive, social, and curious person who really enjoy learning new things and technologies. I'm experienced and comfortable throughout the full stack and am passionate about digitalisation with software and data, and to do it with quality and care.

EDUCATION

M.Sc. in Computer Science | Lunds Tekniska Högskola

2016 – CURRENT

- Master thesis – Data Ecosystem and discovery in an industry context.
- Master specialisation - Software Engineering
- Fall 2018 - Exchange semester at Beihang University, China

WORK EXPERIENCE

Summer Internship | Bosch GmbH

Lund 2021: Realising a POC of metrics gathering, parsing and visualisation of Gerrit metadata.

Set up pipelines in Jenkins for triggering and execute the tool. Visualisation was done in Grafana.

Language, workflow, area: Python/SQL/Groovy, Scrum, Back- and mid-stack.

Summer Internship | Ericsson

Lund 2020: A part of an agile team of students further developing and maintaining a simulation- and visualisation tool. Continued with part time work during the fall.

Language, workflow, area: Python, Scrum, Full - stack.

Linköping 2019: A part of a Q&A team where I worked with monitorization, allocation of resources as well as running system tests upon new functionality changes. Also worked on writing new functionality tests.

Language, workflow, area: Java, Lean/Scrum, Back-end / CM (CI/CD).

Lund 2018: A part of a team working with Energy Efficiency & Media Quality. The work mainly revolved around research and development of internal idea's as well as existing proof of concepts. I also implemented a larger functionality test and visualisation of the result.

Language, workflow, area: Python/Erlang/C, Scrum, Full - stack.

Ericsson Student Ambassador | Ericsson

JAN 2018 – JAN 2020

Student ambassador for Ericsson during school semesters. The work meant to plan, organize, and execute different student events with Ericsson at campus. I also assisted in welcoming and take care of the rest of the summer interns during the summers.

QUALIFICATIONS

- Python, Java, Scala, C#, Groovy, TypeScript, SQL-query & Linux env.
- Agile knowledge and experience.
- Fluent in English, speaking and writing.
