ABOUT ME

I see myself as being a positive, social and curious person who really enjoy learning new things and technologies. Through my education, more specifically specialisation, and work I've come to find configuration and development management to be a very interesting area of software development. Although, I also enjoy pure programming and the connected problem solving very much. Design in general is also a big passion of mine which makes programming so much fun, being present both the back-end but maybe more prominent in front-end.

EDUCATION

M.Sc. in Computer Science | Lunds Tekniska Högskola
2016 – CURRENT
- Master thesis – Data Ecosystem and discovery in an InnerSource context.
- Master specialisation - Software Engineering
- Fall 2018 - Exchange semester at Beihang University, China

WORK EXPERIENCE

Summer Internship| Bosch GmbH
Lund 2021: Realising a POC of metrics gathering, parsing and visualisation of Gerrit data.

Language, workflow, area: Python/SQL/Groovy, Scrum, Back- and mid-stack.

Summer Internship| Ericsson
Lund 2020: A part of an agile team of students further developing and maintaining a simulation- and visualisation tool. Continued with part time work during the fall.

Language, workflow, area: Python, Scrum, Full - stack.

Linköping 2019: A part of a Q&A team where I worked with monitorization, allocation of resources as well as running system tests upon new functionality changes. Also worked on writing new functionality tests.

Language, workflow, area: Java, Lean/Scrum, Back-end / CM (CI/CD).

Lund 2018: A part of a team working with Energy Efficiency & Media Quality. The work mainly revolved around research and development of internal idea's as well as existing proof of concepts. I also implemented a larger functionality test and visualisation of the result.

Language, workflow, area: Python, Scrum, Research & Development / Full - stack.

Ericsson Student Ambassador | Ericsson
JAN 2018 – JAN 2020
Student ambassador for Ericsson during school semesters. The work meant to plan, organize, and execute different student events with Ericsson at campus. I also assisted in welcoming and take care of the rest of summer interns during the summers.

QUALIFICATIONS

- Python, Java, Scala, C#, Groovy, TypeScript, JavaScript, SQL-query & Linux env.
- Agile knowledge and experience.
- Fluent in English, speaking and writing.
